#### Important Notes:

- 
- a. *All Tariffs are collected in USD, including those that may be set in foreign currency. Tariffs include only standard fees collected by Apricot Capital (DIFC) Limited ("the Company"), unless otherwise specified in the Tariffs, while non-standard fees collected by intermediary banks, brokers and custodians (e.g. bank transfers) are subject to compensation to the Company by the client. In the absence of sufficient funds on the client account, the Company has the right to convert the client money held in another currency for the purpose of collecting the exact amount of the fees. In this case, the fees are collected using the exchange rate offered by intermediary banks, choosing the most favourable rate for the client, where possible.*
  - b. *Safekeeping fees are calculated on the average daily balance of securities held on the client account on a monthly basis. For that purpose, the market values of securities are calculated using reliable information from reputable sources (e.g. Bloomberg, Yahoo), as well as from intermediary banks, brokers and custodians, with whom the securities in question are held in safekeeping. In the absence of reliable market values for a given security, the value of the security underlying the depository receipt may be considered.*
  - c. *On expectational basis, and depending on the business profile of the client, as well as the nature, volume and risks associated with their transactions, the Senior Executive Officer of the Company may take a properly documented decision to apply fees that are different from the Tariffs, on which the client should be properly notified by the Company in advance.*
  - d. *Tariffs do not include the fees collected by intermediary banks, brokers and custodians from the Company. The fees collected by intermediary banks, brokers and custodians for the purpose of executing client transaction are subject to compensation to the Company by the client separately, even if the given transaction is not executed for reasons beyond the Company's control.*
  - e. *Tariffs are rounded to 1 digit after the decimal point in the case of AMD and to 2 digits in the case of foreign currency; however, depending on the characteristics of the intermediary banks, brokers and custodians, through which the Client's instruction or order is executed, the rounding may happen to be at the detriment of the Client.*
  - f. *The following additional fees are also subject to collection from the client:*
    - *UK Stamp Duty: 0.5% of the transaction value (for buy trades), details [here](#);*
    - *Panel on Takeovers and Mergers (PTM) fee in the UK: £1 per contract in cases where the trade value exceeds £10,000, details [here](#); and*
    - *France: 0.3% for buying certain securities, details [here](#).*
  - g. *Fees for individual transactions that fall into the pre-defined ranges in the Tariffs are dependent on a number of criteria used by the Company, including changes in fees collected by intermediary banks, brokers and custodians, the liquidity of the particular security in the market, overall changes in interest rates in the market, the competitive landscape in the industry, the nature, volume and risks associated with the client transactions, and other factors.*
  - h. *Tariffs are reflected without VAT and are subject to taxation in cases specified by UAE legislation.*

**Table 2. Interest rates for short positions (negative balances) held by clients**

| Currency                                           | Annual interest rate |
